

Prepare for Emergencies – Save Your Medical Info Now!

Step 1: Log into your patient portal.

If you've never logged in, set up your portal to our practice at

Step 2: Download your clinical summary,

including your vital personal medical information, and current prescriptions.

Step 3: Save your clinical summary!

You can print it and place it with documents you would take in the event of a disaster requiring evacuation. You can also take a picture of each page with your smartphone.

At least save information about current medications, allergies, recent diagnoses, and primary care physician contact.

If you need medical treatment during an evacuation, you will have important medical information available for the treating physician.
